## Getting Started

By Jonathan Pech-Scott

We are a creative company that is interested in helping your company achieve its goals and make a profit without the overpriced cost of those "big named" companies.

Plus we work with you to meet your needs and the price that best fits you. The company started out with the support of LOGPIPE LLC and went on to server companies who were tired of the overpriced charges of the big named designers.

We are set out to create an easy business solution that helps your company expose themselves to the world and the market that is best for you.

### INSIDE THIS ISSUE

**Pg.1** Getting Started

**Pg.1** What this newsletter offers

**Pg.2** The recommendation of the month.

## What this newsletter offers...

By Jonathan Pech-Scott

"You can transform your life and business just by reading a little about your hosting provider." This newsletter was designed to make your life easier to follow your hosting, website and SEO service with SURETOSURF.

With this newsletter you can read about special software offers, promotions in equipment and new developments with your service and add-ons that can really maximize your productivity.

For example: did you know that you are entitled to an unlimited amount of email accounts? All you have to do is register to get your login and password for the email account setup.

All this can be found on this newsletter at the end of every month. So check your email -you might be surprised by what you learn today.

## AVG antivirus

By Jonathan Pech-Scott

Computer and internet use is an integral part of our everyday lives. Every aspect of our lives is accessible electronically, which brings considerable benefit – and, unfortunately, considerable risk. Our role is to shield you from that risk by providing powerful, easy-to-use protection that works efficiently and invisibly in the background so you can focus on using your computer, not worrying about security.

---

*“In a nutshell, AVG enables people and businesses to use computers with confidence.”*

---

As the nature of threats continues to evolve - from computer - and web-borne viruses to complex exploits designed to steal information for financial gain, the nature of protection must also evolve. Using the latest technology developed by world-renowned security experts, AVG provides real-time defenses against real-time threats. With AVG software on your system, you can safely surf the net, create online profiles, shop, bank online, download files, store data, chat, and email, safe in the knowledge that your personal and professional information will not be stolen or misused.

**In a nutshell, AVG enables people and businesses to use computers with confidence and without aggravation by protecting them from disruption and loss.**
